

SOLAR CONTROL GLASS TINTING CO.

OFF (800) 999-3828 - FAX (800) 475-1108

Designers and Interior Decorators,

The Solar Control Company is very excited about it's new product, "Vista" by CPFilms and we are sure that you will be also, especially when you can see how you can grow your profits with us. This latest technology in window film products will give you answers when your customers complain:

- My wood floors, carpets, draperies and new furniture are fading!
- The glare is so bright I can't see my TV!
- We never use these rooms because it gets so hot in here!
- What can I do about those high windows, I don't want to loose my view!

Vista comes in six neutral colors, is scratch resistant, has a clear drying adhesive, and carries a lifetime warranty. Solar Control also includes a two year thermal glass breakage warranty with all qualifying installations, and our new Vista Gold Warranty will match existing glass warranties on new dual pane glass for the life of the manufacturer's written warranty.

Vista films will not discolor, bubble, peel or give a distorted view. Because Vista films reject 99.5% of the UV, it not only reduces fading but enhances the view. For these reasons the #2 hotel in the world, The Mauna Lani Bay Hotel and Bungalows, recently selected Vista for their windows.

The Solar Control Company has been in business for over 32 years. We are Diamond Certified, Value Star Certified and a member of the Better Business Bureau. Our installers are factory trained, licensed, bonded and insured.

Interested? Why not call us today to find out about our Designer compensation program?

Thank you for this opportunity,

Sincerely,

Rocky Burcham
