SERVING THE BAY AREA AND NORTHERN CALIFORNIA SINCE 1975

Contractor Lic. # 636209

The Solar Control Company has been providing window tinting to customers in Northern California since 1975.

We are Diamond Certified and Value Star Certified, Licensed Contractors, #636209. Fully insured with Liability and Workmen's Compensation Insurance.

These are the following services we provide:

## Window Film Types:

1. Reflective Films
2. Dual Reflective Films
3. Ceramics Films, (non-reflective)
4. High Performance Films, (non-reflective)
5. Blackout and Whiteout Films ( non see thru)
6. Safety / Security Film for breaking and entering
7. Clear Safety Film for earthquake or storm damage
8. Privacy Window Film, five different styles of frosted film.
9. White Frost, Bronze Frost, Green Frost, Grey Frost & Silver Matt Frost.
10. Decorative Film and designs. (stripes, squares, frosted crystal, circles etc.)
11. Clear Film for Graffiti Protection - used on outside of glass doors & windows, formica, stainless steel elevator doors and walls, mirrors and bathroom stalls.
12. Clear RF/IR Radio Frequency Attenuating Window Film. This RF/IR window film blocks unauthorized parties from eavesdropping, monitoring, recording and stealing confidential and valuable electronics information and voice conversations from an organization through their glass windows.

## Commercial Applications:

Please Note that PG&E Gives a \$1.35 per sq.ft. back in a cash rebate for the installation of certain types of reflective and non-reflective films to help lower the air conditioning load.

## Residential Applications:

The IRS now allows households to deduct a percent of the installation off their taxes. Certain window film products are being certified to be compliant with the internal Revenue Code, Section 25C for energy tax credit treatment.
