

IS YOUR SECURITY COMPROMISED?

Established in 1975, **Solar Control** Glass Tinting Company specializes in helping businesses save on utility bills with our new high performance window films. In today's technological and wireless world, **Solar Control** now offers protection against the specter of identity and information theft with our new Signal Defense Security Film by LLumar®. Radio frequency (RF) and infrared (IR) signals generated from electronic and voice devices within a building "leak" through the glass windows to the outside world, introducing a significant security threat. Consider getting SDS a necessary precaution to ensure that privileged and confidential information remains inside your office or home. Call us today or visit our website for more information.
