Customers may be eligible to participate in Pacific Gas and Electric Company's (PG&E) Demand Response Incentive programs. Refer to www.pge.com/demandresponse for the requirements and guidelines of these programs or call the **Business Customer Service Center** at **1-800-468-4743**.

Carefully read the specifications below to ensure that you are installing qualifying products. All PG&E incentives apply towards the purchase of new or replacement energy-efficient equipment. Used or rebuilt equipment is not eligible, and customers must include proof that the appliances meet all the required energy efficiency specifications. Please note that funding for these programs is limited and available on a first-come, first-served basis until allocated funds are exhausted or the program ends, whichever comes first. This program may be modified or terminated without prior notice, and additional terms and conditions apply.

For our most up-to-date catalogs, please visit www.pge.com/businessrebates.

Appliances

Electric Heat Pump Water Heater

Requirements:

- Electric storage water heater must have an Energy Factor (EF) of 2.0 or greater.
- Capacity must be 40 gallons or more.
- Must be new and meet or exceed all applicable local, state and federal standards.
- Only residential-style electric storage water heaters qualify for this rebate. Go to www.energystar.gov for a list of ENERGY STAR®-qualifying water heaters that meet or exceed the EF requirements.
- Check with your contractor for installation requirements for your installation address.
- Installation address must have a commercial electric account with PG&E.
- Must be a commercial end-use customer.

Exclusions:

Instantaneous or tankless water heaters do not qualify for this rebate.

Rebate Code	Description	Rebate/ Unit Measure
HA47	ENERGY STAR Electric Heat Pump Water Heater EF of 2.0 or greater	\$500/unit

Natural Gas Storage Water Heater

Requirements:

- Gas storage water heater must have an Energy Factor (EF) of 0.67 or greater.
- Capacity must be 40 gallons or more.
- Must be new and meet or exceed all applicable local, state and federal standards.
- Check with your contractor for installation requirements for your installation address.
- Go to www.energystar.gov for a list of ENERGY STAR®-qualifying water heaters that meet or exceed the EF requirements.
- Installation address must have a commercial gas account with PG&E.
- Must be a commercial end-use customer.

Exclusions:

Instantaneous or tankless water heaters do not qualify for this rebate.

Rebate Code	Description	Rebate/ Unit Measure
HA58	ENERGY STAR High-Efficiency Gas Storage Water Heater EF of 0.67 or greater	\$200/unit

High-Efficiency Clothes Washer

Requirements:

- Clothes washer must be a Consortium for Energy Efficiency (CEE) Tier 3 model or higher. Go to www.cee1.org/com/cwsh/cwshspec.pdf for a list of qualifying commercial washers.
- The washer must have a Modified Energy Factor (MEF) of 2.4 or greater **and** a Water Factor (WF) of 4.0 or less.
- Installation address must have commercial electric and/or natural gas accounts with PG&E.

Exclusions:

- Not all ENERGY STAR clothes washers qualify for this rebate.
- CEE Tier 1 and 2 models do not qualify.

Additional Details:

Customers residing in certain service areas may be eligible for higher rebate amounts through their local water agency. Please visit www.waterenergysavings.com for more information.

Rebate Code	Description	Rebate/ Unit Measure
B345	High-Efficiency Clothes Washer	\$50/unit

High-Efficiency Refrigerator

Requirements:

- Refrigerator must be a Consortium for Energy Efficiency Tier 3 Model. Go to www.cee1.org/resid/seha/refrig/files/ref_prod.pdf for a list of qualifying refrigerators.
- Refrigerator must be mid-sized or full-sized (7.75 cubic feet and above).
- Rebate is applicable to the following qualifying refrigerator configurations:
 - Bottom-mount freezer
 - Side-by-side or side-mount freezer
 - Top-mount freezer
 - French door
- Installation address must have a commercial electric account with PG&E.

Exclusions:

- Not all ENERGY STAR refrigerators qualify for this rebate.
- CEE Tier 1 and 2 models do not qualify.
- Please note that compact refrigerators (7.75 cubic feet or less), keg/beverage centers, wine coolers/chillers, and upright/chest freezers do not qualify for this rebate.

Rebate Code	Description	Rebate/ Unit Measure
RFEF	High-Efficiency Refrigerator CEE Tier 3 7.75 cubic feet and above	\$75/unit

General Improvements

Window Film

Requirements:

- Must have a minimum five-year manufacturer's warranty.
- Must be applied to clear, single-pane glass and have either:
 - A Solar Heat Gain Coefficient (SHGC) value of 0.39 or less.
 - A SHGC value of 0.47 or less **and** a Visible Transmittance (VT) to SHGC ratio greater than 1.3 (VT divided by SHGC).
- Space must be cooled by a vapor-compression air conditioner.
- If the window film is applied to windows with existing film:
 - Existing film must be removed before new film installation.
 - Existing film needs to have been installed at least 13 years prior, and documentation must be provided which proves this minimum age.
- Installation address must have a commercial electric account with PG&E.

Exclusions:

- Evaporative-cooled spaces do not qualify.
- No windows with northern exposure (+/- 45 degrees of due North).
- No dual-pane glass.

Application Process:

- Confirm that the SHGC, Shading Coefficient (SC), VT specifications and square footage installed are documented on your invoice. To convert SC (if listed on product) to SHGC, multiply SC x 0.87. If SC is listed in percent form (%), convert it to a decimal form before multiplying.
- Submit a copy of the warranty with your application.

Rebate Code	Description	Rebate/ Unit Measure
B07	Window Film	\$1.35/sq. ft.

Definitions

EF—Energy Factor: A measure of water heater efficiency—a higher Energy Factor indicates a more efficient water heater. EF is based on recovery efficiency, standby losses and cycling losses.

MEF—Modified Energy Factor: Measures energy consumption of the total laundry cycle (washing and drying)—the higher the number, the greater the efficiency. It indicates how many cubic feet of laundry can be washed and dried with one kWh of electricity.

SC—Shading Coefficient: The Shading Coefficient determines the type of thermal performance of a glass window/panel, and it primarily acts as an indicator of how the glass is thermally insulating (shading) the interior of the facility when there is direct sunlight shining on the panel or window.

Solar Heat Gain Coefficient: The measure of the amount of solar energy that passes through the window.

VT—Visible Transmittance: An optical property that indicates the amount of visible light transmitted through the glass.

WF—Water Factor: Represents the number of gallons of water needed per wash cycle for each cubic foot of laundry. A lower WF number indicates lower consumption and more efficient use of water.

More ways for your business to save money.

Looking for more information on PG&E rebates and incentives for your business? Visit www.pge.com/businessrebates to access the latest rebate information and catalogs. If you are ready to apply for a rebate, you can download an application at www.pge.com/businessrebates. You may also apply online and check the status of your rebate(s) through PG&E's eRebates at www.pge.com/mybusiness/erebates.

PG&E offers a wide range of tools and resources at www.pge.com/mybusiness/energysavingsrebates that can help your business save energy and money and help the environment, such as:

- Sign up for Automated Benchmarking Service at www.pge.com/benchmarking, so that you can use the ENERGY STAR® Portfolio Manager to track and compare your facility's energy performance over time.
- Use PG&E's audit tools to identify options for saving energy and money at your facility, and get started on developing a comprehensive energy management plan.
- Find a suite of customized incentives for retrofitting outdated, inefficient equipment, as well as incentives to optimize existing equipment through retrocommissioning.
- Explore PG&E's Demand Response programs, which offer incentives for managing your energy use during times of peak demand.
- Check out PG&E's incentives for solar, wind and fuel cell self-generation equipment, if you're considering generating your own electricity.

You may also learn more about these programs, tools and offers by contacting your local PG&E Account Representative or by calling our **Business Customer Service Center** at 1-800-468-4743.

Ready to get started with your next project and need the help of a contractor? Find local vendors who participate in PG&E's Energy Efficiency Rebates for Your Business Program at www.pge.com/tradeprodirectory.
